Professional Summary

Entry-level Backend Software Engineer with hands-on experience building RESTful services, microservices-aligned backend modules, SQL-backed data models, and CI/CD-ready delivery workflows using Java and Node.js. Strong foundation in DSA, OOP, debugging, and API reliability.

Technical Skills

Core Backend: Java, Node.js, Python, SQL, RESTful services, Microservices architecture
Frameworks and APIs: Express.js, Flask, JWT auth, API integration, Webhooks
Databases and Cloud: PostgreSQL, MongoDB, SQLite, AWS fundamentals
Dev Tools: Git, GitHub, Linux, Docker, CI/CD pipelines, Unit testing
CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Internship Experience

Android Development Intern, Skillbit Technologies Jun 2025 – Jul 2025

- Supported backend API integration with Android modules and collaborated with senior engineers to resolve 15+ defects, improving stability and release confidence.

Web Developer Intern, CodSoft Jul 2024 – Aug 2024

- Built 3 responsive web applications, integrated third-party APIs, and improved frontend performance by approximately 20% through optimization.

Projects

NGO-Connect AI (Backend-Heavy Full-Stack Platform) 2025 – 2026

Node.js, Express, PostgreSQL, React, JWT, Gemini API

- Engineered backend services with 149 RESTful endpoints across auth, campaigns, donations, volunteering, messaging, admin, and innovation modules with role-based authorization.
- Implemented 8 AI endpoints for recommendations, campaign classification, proposal drafting, fraud scoring, forecasting, support chat, and volunteer matching, improving platform engagement through personalized workflows.
- Designed a normalized PostgreSQL model with 35 tables and built webhook reliability features (dead-letter queue, replay worker, metrics/export, cleanup), validated via a 35-step smoke suite (21.69 ms avg, 72 ms p90).

Internship Yuva - Advanced Subscription Manager (GitHub) 2026

Python, Flask, SQLite, pytest

- Developed backend modules for authentication, per-user CRUD, analytics API, CSV export, and rule-based filtering for subscription tracking workflows.
- Implemented 9 routes and 7 automated tests; executed a 900-request benchmark at concurrency 20 with 15.83 requests/second and 0% error responses.

Backend Financial Workflow System 2025

Java, SQL, REST APIs, Git

- Built Java backend modules and RESTful services for transactional financial workflows with modular, microservices-friendly design practices.
- Contributed to debugging, unit testing, code reviews, and CI pipeline workflows to improve production readiness and secure coding quality.

Education

B.Tech in Computer Science and Engineering, CMR University, Bengaluru 2026

CGPA: 7.81/10

Higher Secondary Education, Kamla High School 2020

Percentage: 71.20%

Certifications and Achievements

- NCAT Exam (Naukri, 2025) – All India Rank 6423
- Web Development Projects Certification – CodSoft
- JITHACK'24 Hackathon – Travel Booking Website Project
